A.C.E. Building Service completes sorting house project for Sadoff Iron & Metal in Fond du Lac

A.C.E. Building Service recently completed the design and build of a 1,185-square-foot scrap metal sorting house for Sadoff Iron & Metal Company in Fond du Lac. The new two-story structure features improved ergonomics, enhanced safety features and recycling efficiency for the metal recycling company.

This project is part of a larger improvement to Sadoff's entire yard operation at 240 W. Arndt St. in Fond du Lac and is the second sorting house A.C.E. has completed for Sadoff – the first one was constructed in 2006 at Gus Holman Co. in Sheboygan, a division of Sadoff.

Founded in 1950, A.C.E. Building Service is located in Manitowoc and provides commercial and industrial construction services – including new buildings, expansions, renovations, metal re-roof, facilities maintenance, design/build, and build/lease – to Manitowoc and Sheboygan Counties.

Sadoff Iron & Metal is a ferrous and nonferrous scrap metal recycling company with headquarters in Fond du Lac, Wisconsin. The company, which has six recycling facilities in Wisconsin and another operation in Lincoln, Nebraska, provides scrap metal recycling services and scrap management programs to industry, and ferrous and nonferrous melt products to foundries, mills and smelters.
