A.C.E. Building Service employees learn commercial construction trends at national conference

Stan Johnson, Bill Shimek and Doug Schwalbe of A.C.E. Building Service attended the 2011 Butler Builder North American Sales Meeting held in Atlanta, Georgia Feb. 27 to March 1.

The three joined more than 700 builders from across North America to learn in-depth information and updates on new products that can benefit A.C.E. customers, including modular mezzanines, precast wainscot panels, and green buildings. Discussion also centered on upcoming improvements in engineering software systems that should allow for quicker design and improvements. Additionally, the conference allowed A.C.E. to network with other commercial and industrial builders from around the country to share ideas and building success stories.

Founded in 1950, A.C.E. Building Service is located in Manitowoc and provides commercial and industrial construction services – including new buildings, expansions, renovations, metal re-roof, facilities maintenance, design/build, and build/lease – to Manitowoc and Sheboygan Counties.

Butler Manufacturing™ was founded in 1901 and currently operates manufacturing, engineering, and service centers throughout the United States and around the globe. The company's products are primarily sold, installed, and serviced through independent dealers (Butler Builders) in the United States and throughout the world.
