A. H. Stock Manufacturing announces expansion project

A.H. Stock Manufacturing in Newton has announced an expansion project, with A.C.E. Building Service selected as the design/build contractor. A.H. Stock Manufacturing is a builder and fabricator of metal products for a variety of industries. They manufacture various components for several Midwestern OEM manufacturers involved in heavy lifting equipment, large tooling centers and fabricating equipment among others.

The company is expanding to help create space for their first laser machine. The 6,000 square foot addition will be connected to an existing Butler metal building that was built in 2007 and designed specifically for future expansion. The project should be completed by mid summer.

Founded in 1950, A.C.E. Building Service is located in Manitowoc and provides commercial and industrial construction services – including new buildings, expansions, renovations, metal re-roof, facilities maintenance, design/build, and build/lease – to Manitowoc and Sheboygan Counties. They have been a certified Butler builder of pre-engineered metal buildings since 1973.
